**STYLE - HATEFUL SLUDGE DOOM**

Giant-sounding stoner-rock with a vocalist who sounds like he's being squeezed in some pretty painful places, although not as bad as that description implies, in other words, he's higher up on the tonal scale but still rages and shouts with the best of them, fitting the music like a glove. Then the music itself - wickedly slow slices of stoner doom, that suddenly erupt into life with a hail of guitars reigning down, before settling back into the monstrous-sounding, guitars-heavy, monumentally slow rhythm mayhem of its truly sludge-laden, doomy approach. Fantastic stuff. (CD Services)
