...making DOOM revolution...

DREAM DEATH - BACK FROM THE DEAD (PSY 014)

This is the official release of the original 3 DREAM DEATH demos. The S/T '86 demo, '87's "More Graveyard Delving" demo, and '88's 3 song demo "Ode to Sorrow".

80 minutes long. Comes with 20 pages booklet, all lyrics, tons of never seen before photos, flyers etc. Compiled and produced by original drummer Mike Smail (now Penance, Internal Void, Pentagram). CULT!

Combination between doom elements with hardcore-ish vocals and speedy parts. Seen by some people as a sort of 'missing link' in Doom-metal evolution from traditional Doom-metal to Death/Doom metal. This theory is based on the fact that you can hear both elements on their debut album. The band broke up, but most members later reformed with a slightly modified line-up under the name Penance.
