...making DOOM revolution...

MOOD - SLOW DOWN limited re-issue (PSY 017)

What's MOOD spelled backward? Classic trad doom that would have felt right in place with in the golden years' of Rise Above.

The 2nd album from these cult doom legends - gem like doom in the vein of Sabbath, Obsessed and even a bit of Cathedral.

Now, the long time sold album of MOOD (pre. Wall of Sleep) called "Slow Down" is available again in a limited version to the public.

Cult traditional Doom band from Hungary featuring Wall of Sleep and Stereochrist members. The music is Sabbath inspired and generally mid-tempo with some more up tempo parts. The band gained quite a bit of a following throughout the years due to it's solid quality releases. Still Mood has always remained largely unknown to the larger doom-metal audience, due horrible promotion.
