"Endofyoreerror", originally released in 1996 on their own record label, was Negative Reaction's first full length CD. After 7 years, and two other full length CDs including "The Orion Chronicles" in 2000 featuring the 38 minute long "Moon Song" and "Everything you need for galactic battle adventures", Negative Reaction's first co-release with Game Two Records in the USA, and psycheDOOMelic records in Europe in 2003, this 2003 re-release of "Endofyoreerror" by psycheDOOMelic records comes to you with some slight differences from the original release. The two original bonus tracks have been replaced with one song from the Orbit EP, Negative Reaction's first release with Game Two Records in 1998. We hope you enjoy this archival masterpiece from the gods of sludge.
