10. Born into Eternity

Album info:

Think: Early Sabbath. That's what this new Starchild CD sounds like to me, and that's what it'll sound like to you too. If you like early Sabbath -- and you'd better, or you're pretty fuckng lame -- you'll love Starchild, because it's like a whole bunch of brand new early Sabbath songs are being written in the present. This is some extremely spaced out music. Echoed vocals and a heavy, but laid back, vibe dominates the music. The solos are straight out of doom-rock, Iommi hell. With this release, this band has vaulted themselves to the same level as veterans of the scene like sHEAVY and even ST VITUS.
